

```

//Elsa mariya george,statistics
#include<string.h>
#include<stdio.h>
#define max 20
#define items 5
int main()
{
    char f[items][max],dummy[max];
    int i=0,j=0;

    printf("Enter the name of %d items \n",items);
    while(i<items)
    {
        scanf("%s",f[i++]);
    }
    for(i=1;i<items;i++)
    {
        for(j=1;j<items-i;j++)
        {
            if(strcmp(f[j-1],f[j])>0)
            {
                strcpy(dummy,f[j-1]);
                strcpy(f[j-1],f[j]);
                strcpy(f[j],dummy);
            }
        }
    }
    printf("Sorted list:\n");
    for(i=0;i<items;i++)
    {
        printf("%s\n",f[i]);
    }

    return 0;
}

```

```

lroot@HP:~# gcc sort.c
root@HP:~# ./a.out
Enter the name of 5 items
apple
banana
orange
coco
mango
Sorted list:
apple
banana
coco
orange
mango

```
